

Did you know?

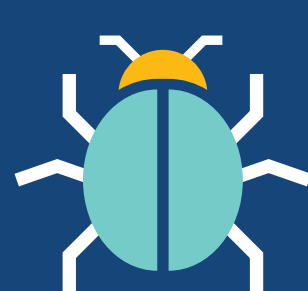

89%

of all business workstations are not backed up ¹

Data threats are all around us...

Hardware Failure

Malware Attack

Natural Disaster

User Error

Plan for business continuity with a cloud based solution for secure access and recovery when needed.

Cloud Based

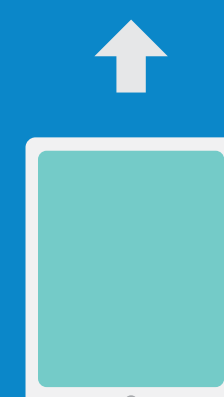

Productivity

Transparent to the User. Protection with cloud backup and multi-device sync enhance productivity

File History

90 days of file version protection enable user productivity and business continuity after an error or malicious attack

Scalability

Enterprise ready with centralized control and activity directory integration

Seamlessly backup enterprise data to ensure resilient recovery from security events such as hardware failure, malware attack, natural disaster, or simple user error.

Cloud-Based Solution

Made for Enterprise

Centralized Management

Active Directory Integration

Backup restoration used to be the number one IT pain point. Now we have no problem with it, and that has made MozyEnterprise very popular in our department.

-Dylan Pegoraro, IT Operations Manager, Itron

Mozy Features

Automatic or scheduled backups
